

What's a Cryptoblog? Cryptogroup?

Cryptogroups are an essential ingredient (maybe the essential ingredient) in modern astroturf. They are groups who present as local, grassroots groups but are actually directed and funded by the same few national socialist activists, politicians, and foundations.

A Cryptoblog is the same thing in an online-majority variant.

These are, in classical propaganda theory, "Grey" (sponsor concealed) or "Black" (sponsorship misattributed) propaganda.
